DESCRIPTION

After three standout EPs on Atomnation, Japanese producer and live artist **Ryunosuke Hayashi**, aka **boys be kko**, serves up his long-awaited debut album. *Hensa* is a serene nine-track electronic trip that oozes musical charm. He makes his music in a studio with its own roof terrace and counts the likes of **&ME** and **Bonobo** as fans while Running Back boss **Gerd Janson** has remixed him in the past. This new album finds him expand on his always emotive, clean and futuristic fusion of house, disco and melodic techno in alluring new ways. This is a brain-cleansing, soul-enriching work of melodic electronic perfection from boys be kko.
