DESCRIPTION

Carefully constructed aural rituals from **T.A.G.C.**, this album maps new realms in the area of sensual electronic music. Founder **Adi Newton (Clock DVA)** uses **The Anti Group** as an outlet for his research in psycho-acoustic music. *Iso-Erotic Calibration* explores the potent topic of human sexuality. Recorded over a period of three years, this could be considered one of their more "accessible" albums. Originally released in 1994, Cold Spring now presents the album for the first time on vinyl, as well as the first official CD reissue, fleshed out with four bonus tracks: two were bonus digital-only tracks (2013); one track is taken from the soundtrack to the 2011 T.A.G.C. film *Given*; one is a remix of the title track. **The Anti Group Communications** (T.A.G.C.) was devised by Adi Newton and **Steven James Turner** as early as 1978 as a multi-dimensional research and development project. TAGC are not affiliated to any one system of philosophy or epistemological paradigm or occult fraternity but are open more to individual systems and innovative thinkers in science, art, music sonology, visual arts, literature, research and publication are its main areas. The artwork is filled with text and illustrations supporting the different songs.
