DESCRIPTION

"*Sleep Deprivation* began in 2006, during a time when our sleep patterns were drastically altered by constant travel and late-night gigs. This relentless cycle of broken sleep became a persistent part of our lives, and over time, we noticed something remarkable: our music became more emotional, raw, and vulnerable. Sleep, or the lack of it, affects every aspect of life, and its influence on our creative process was undeniable. For this album, we chose to embrace that emotional intensity, allowing it to take center stage over traditional arrangements. Sleep deprivation blurs the lines of logic, and the part of the brain that usually handles structure and order begins to falter. In that haze, deeper feelings rise to the surface, unfiltered and honest. With this album, we surrendered to that experience, letting the emotional chaos shape the music, and the result is an exploration of what happens when you're pushed to your limits, both physically and creatively." -**The Black Dog**
