DESCRIPTION

A kaleidoscopic sonic riot, *Nandakke?* is the hotly anticipated debut album from Japanese-Belgian duo **Aili**. Featuring ten tracks of surreal electro-pop, joyful electronica, house music and more, *Nandakke?* is a euphoric album that sees **Aili Maruyama** and **Orson Wouters** more than fulfil the promise of their acclaimed debut EP. Recorded over the course of six months in Orson's studio, packed full of vintage synths, *Nandakke?* captures the spontaneous spirit and creativity of those sessions. Exchanging riffs and rhythms, bouncing sounds and samples off each other, Aili and Orson would let the music take them where it wanted. The result – an album full of wild ideas and bold, playful experimentation. One minute a pulsing electro-pop number featuring Aili's dad discussing his takoyaki (battered octopus) recipe, the next an explosive high energy workout song like "Up & Down." Whether Aili's singing about the language she invented with her father over the years to bridge the gap between them, the idiosyncratic Japanese relationship to fashion, or riffing on children's playground songs, the result is a remarkable album that defies easy categorization.
