DESCRIPTION

Presenting the genre defining and much hip hop sampled **Ambient Jazz Ensemble**. AJE's **Colin Baldry** has a highly accomplished career in music writing and producing for iconic labels Motown, RCA, Geffen, Virgin and Capitol Records. *London Fields* describes London energy, vibe, anticipation; "fields" of electricity: "The phrase conjures something of my own relationship with London. Having moved away after living and working there for 20 years I've recently fallen in love with the city again. I've been walking the streets, rediscovering its parks, canals, the architecture, the river; experiencing new music in London is always a joy. The *London Fields* have re-captured my imagination." "Ensoul" delivers sparse felt piano before **Lynsey Ward** releases her inner **Kate Bush**. "Locked" inspired initially by **Tony Robert-Fleury**'s 1891 painting *Alix Appearing in Mask*.
