### DESCRIPTION

43°C, the debut LP by French electronic producer **Basile3**, is the result of a decade of cultivating a musical identity that focuses on hybridization, sonic recycling, and playfulness. The enigmatic title 43°C signifies a haze of bliss (4+3=7, the producer's lucky number) backdropped by the ecological state of a world that's grown slightly but surely warmer. In this anticipation fiction, Basile3 offers a soundtrack that is an exploration of club music, electronica infused with R&B and ambient synths. The French producer warmly invites listeners to his state of mind, blooming with genre-bending floating soundscapes. Featuring **Telma Cappello**, **Daisy Ray**, **Loydfears**, **Lucy Sissi Miller**, and **Minor Science**.
