## DESCRIPTION

Second album from the Japanese psych-prog band that started out as **Far Out** in 1973. The record is basically a concept: "The Cave" is arriving onto the planet, and the group is generally celebrating the beauties of nature. Heavily influenced by **Floyd** (*Atom Heart Mother* era), the group lays down some very credible ambiances that even **Waters & Co.** could've pulled off. This album draws **Klaus Schulze**'s attention and he will collaborate with **FEFB** on their next one.
