PEOPLE**

DESCRIPTION

Valentina Villarroel is a sound artist and phonographer who explores the intricate dynamics within various Southern ecosystems. Her work revolves around the profound potential of acoustic ecology, particularly in the face of encroaching real estate development on natural spaces. She also delves into the consequences of sound pollution on numerous species, contributing to their decline or disappearance. In recent years, her focus has extended to urban soundscapes and significant sonic events, such as the October 18th protest in Chile. With a solid background in bioacoustics applied to both human and animal well-being, Valentina assumes the role of co-director at AOIR Sound Laboratory. There, she spearheads an interdisciplinary initiative that centers sound as its core element. This includes the creation of the sonic cartography portal aoir.cl, as well as the development of handmade electronic devices like the Bowerbankii and the creation of various experimental microphones.

TRACKLISTING

01. Antena Magnética Captando Campos Electromagnéticos I
02. Antena Magnética Captando Campos Electromagnéticos II
03. Micrófono De Contacto Captando Vibración Del Puente Llacolén
04. Micrófono De Contacto Captando La Interacción Entre El Viento Y Un Árbol
05. Micrófono De Contacto En Elementos Vibrantes
06. Micrófonos De Contacto Captando Granizos
07. Micrófonos De Contacto En Autobús
08. Hidrófono Bajo El Fondo Del Mar
09. Vibraciones De Materiales Geofon II
10. Vibraciones De Materiales Geofon I
11. Vibraciones De Materiales Geofon III
12. En La Dirección Del Viento
13. Ronroneo De Selai
14. Ráil
15. Efectos Sonoros En La Naturaleza
