DESCRIPTION

John Holt began his career in ska, came to prominence in the **Paragons** in rock steady and achieved international breakthroughs as a solo roots crooner, remaining versatile in terms of approach and subject matter. *Peace Maker* is an intriguing album of the mid-1990s, this time recorded between Jamaica and the UK with top-class musicians such as **Sly** and **Robbie**, **Lindel Lewis** and **Steely** of **Steely and Cleve** fame. With his voice entirely undiminished and a mixture of romance ballads and songs of social commentary, this is another fine collection that will delight all John Holt fans, as well as reggae heads who favor the sentimental.
