DESCRIPTION

Octet supergroup lead by **Eric Quach** aka **Thisquietarmy**. Including three drummers, guitar, synth and brass players (who also play in bands such as **Godspeed You! Black Emperor**, **Exhaust**, **Hanged Up**, **Avec Le Soleil Sortant De Sa Bouche**, and more); **Pangea De Futura** brings together the merged and emerging territories of Montreal's exploratory music scene. *War Milk* is the debut studio album from the supergroup, an octet that has been exploring since 2019, the many ways of – slowly – constructing massive textural musical shapes and droning tribal post-rock ambiances. Each track simultaneously encapsulates its structure emerging from and within a flux, alongside its impending entropy, creating a suspended moment. This intense experience is crafted through the combined rhythmic contributions of **Aidan Girt**, **Eric Craven**, **Samuel Bobony**, the merging brass arrangements of **Véronique Janosy**, **Reüel Ordoñez**, **Neboysha Rakic**, the electronic textures provided by **Charles Bussièrès**, and the intense drones/soundscapes created by Eric Quach's guitar playing. Eight musicians, involved – in total – in some fifty projects from the Montreal scene.
