DESCRIPTION

London-based psychedelic folk quartet **Kaleidoscope** formed as the **Sidekicks** in 1964, changing their name to the **Key** the following year. By the time they signed **Fontana** for the 1967 debut album *Tangerine Dream*, their choral pop harmonies were stronger and the musicianship more accomplished, the distinctly English folk undercurrents more pronounced. A favorite of **Spaceman 3** and other connoisseurs of neglected psych, originals of this rare gem now change hands at extortionate prices and the work has aged like a vintage wine, the unjustly overlooked classic now rightly feted.
