DESCRIPTION

We Release Jazz announces the fourth **Bruno Spoerri** release in the WRWTFWW discography, this time focusing on the Swiss legend's unheard jazz catalogue. The pristine six-track album *Musiques Légères (1976-1982)* is available as a limited edition half speed mastered biovinyl LP housed in a heavy 350gsm sleeve with superb design by **Nicolas Eigenheer** and the classic WRJ obi. Swiss jazz and electronic music pioneer Bruno Spoerri unveils a treasure trove of never-before released songs in this rare archival collection recorded between 1976 and 1982 that includes collaborations with the fabled Radio Suisse **Romande**-backed music ensemble **GIR (Groupe Instrumental Romand)** which featured the crème de la crème of Helvetic forward thinking musicians with an international reputation. The super team of instrumentalists/composers represented Swiss national radio in endeavors that spanned a vast array of music genres such as jazz, pop, experimental music, or what they referred to as 'musiques légères' (light music), their very own brand of jazz and funk infused easy listening. One notable member of GIR was drummer extraordinaire **Stuff Combe** that We Release Jazz collectors will know from his *Stuff Combe 5 + Percussion LP. Musique Légères (1976-1982)* offers a marvelous blend of easy listening jazz, joyful synth improvisations, and soulful funk ballads, a testament to Bruno Spoerri's multifaceted talents and ability to approach various genres while keeping his very personal and very magical touch. Among the hidden gems on the carefully curated collection is the immensely catchy "Prince Karl," an undeniable hit that truly deserves to be heard. This is the fourth Bruno Spoerri release from WRWTFWW, following the synth heavy and galactic *Voice of Taurus* (WRWTFWW 014LP, 2017) and *The Sound of the UFOs* (WRWTFWW 015LP, 2017), and the compilation of unreleased experimental tracks *Rare & Unreleased 1971-1998* (WRWTFWW 033LP, 2018). *Musiques Légères (1976-1982)* is pressed on biovinyl, a sustainable alternative to traditional vinyl. Biovinyl replaces petroleum in S-PVC by recycling used cooking oil or industrial waste gases, resulting in 100% CO savings in bio-based S-PVC production. Furthermore, it is 100% recyclable and reusable, embracing the circular economy ideology.
